The Visualization Toolkit

An Object-Oriented Approach To 3D Graphics

Third Edition

Will Schroeder, Ken Martin, Bill Lorensen

with special contributors:
Lisa Sobierajski Avila, Rick Avila, C. Charles Law

Preface xiii

Acknowledgments xv

Chapter 1 Introduction 1

1.1 What Is Visualization? 1
Terminology 1
Examples of Visualization 2
1.2 Why Visualize? 3
1.3 Imaging, Computer Graphics, and Visualization 4
1.4 Origins of Data Visualization 5
1.5 Purpose of This Book 6
1.6 What This Book Is Not 7
1.7 Intended Audience 7
1.8 How to Use This Book 7
1.9 Software Considerations and Example Code 8
1.10 Chapter-by-Chapter Overview 9
Chapter 2: Object-Oriented Design 9
Chapter 3: Computer Graphics Primer 9
Chapter 4: The Visualization Pipeline 9
Chapter 5: Basic Data Representation 9
Chapter 6: Fundamental Algorithms 9
Chapter 7: Advanced Computer Graphics 10
Chapter 8: Advanced Data Representation 10
Chapter 9: Advanced Algorithms 10
Chapter 10: Image Processing 10
Chapter 11: Visualization on the Web 10
Chapter 12: Applications 10
1.11 Legal Considerations 11
1.12 Bibliographic Notes 11
1.13 References 12

Chapter 2 Object-Oriented Design 15

2.1 Introduction 15
2.2 Goals of Good Software Design 16
2.3 Object-Oriented Concepts 16
2.4 Object-Oriented Terminology 18
What Is an Object? 18
Inheritance 20
2.5 Object-Oriented Modelling and Design 22
The Object Model 23
The Dynamic Model 23
The Functional Model 25
2.6 Object-Oriented Programming Languages 26
2.7 Object-Oriented Visualization 27
2.8 Chapter Summary 27
2.9 Bibliographic Notes 28
2.10 References 29
2.11 Exercises 30

Chapter 3 Computer Graphics Primer 33

3.1 Introduction 33
A Physical Description of Rendering 34
Image-Order and Object-Order Methods 35
Surface versus Volume Rendering 35
Visualization Not Graphics 36
3.2 Color 37
3.3 Lights 38
3.4 Surface Properties 39
3.5 Cameras 43
3.6 Coordinate Systems 45
3.7 Coordinate Transformation 47
3.8 Actor Geometry 49
Modelling 49
Actor Location and Orientation 50
3.9 Graphics Hardware 51
Raster Devices 51
Interfacing to the Hardware 52
Rasterization 54
Z-Buffer 56
3.10 Putting It All Together 56
The Graphics Model 57
Achieving Device Independence 59
Examples 60
Transformation Matrices 69
Assemblies and Other Types of vtkProp 73
3.11 Chapter Summary 74
3.12 Bibliographic Notes 76
3.13 References 76
3.14 Exercises 76

Chapter 4 The Visualization Pipeline 79

4.1 Overview 79
A Data Visualization Example 80
The Functional Model 80
The Visualization Model 80
The Object Model 80
4.2 The Visualization Pipeline 83
Data Objects 83
Process Objects 83
4.3 Pipeline Topology 84
Pipeline Connections 84
Loops 85
4.4 Executing the Pipeline 87
Explicit Execution 88
Implicit Execution 89
Conditional Execution 89
4.5 Memory and Computation Trade-off 90
Static and Dynamic Memory Models 90
Reference Counting 91

4.6 Programming Models 91
Visualization Models 91
Alternative Visual Programming Models 92
4.7 Data Interface Issues 93
Programming Interface 93
File Interface (Readers / Writers) 93
System Interface (Importers / Exporters) 94
4.8 Putting It All Together 94
Procedural Language Implementation 94
Strongly Typed 94
Implicit Control of Execution 96
Multiple Input / Output 96
Support of Looping and Conditional Execution 98
Flexible Computation / Memory Trade-off 98
High-Level Object Design 98
Examples 99
4.9 Chapter Summary 102
4.10 Bibliographic Notes 104
4.11 References 104
4.12 Exercises 105

Chapter 5 Basic Data Representation 107

5.1 Introduction 107
Characterizing Visualization Data 107
Design Criterion 108
5.2 The Data Object 109
5.3 The Dataset 109
5.4 Cell Types 110
Linear Cells 112
Nonlinear Types 114
5.5 Attribute Data 116
Scalars 117
Vectors 117
Normals 117
Texture Coordinates 117
Tensors 117
5.6 Types of Datasets 118
Polygonal Data 118
Image Data 118
Rectilinear Grid 120
Structured Grid 120
Unstructured Points 121
Unstructured Grid 121
5.7 Other Data Abstractions 121
The Application Visualization System 121
The Data Explorer 122
The Visualization Toolkit 122
5.8 Putting It All Together 123
Memory Allocation and Data Arrays 123
The Tuple Abstraction 124
Representing Data With Data Arrays 124

Abstract/Concrete Data Array Objects 125
Data Object Representation 126
Dataset Representation 126
Cell Representation 130
Data Attributes 130
Examples 131
5.9 Chapter Summary 139
5.10 Bibliographic Notes 140
5.11 References 140
5.12 Exercises 141

Chapter 6 Fundamental Algorithms 143

6.1 Introduction 143
Generality Versus Efficiency 144
6.2 Scalar Algorithms 145
Color Mapping 145
Contouring 146
Scalar Generation 152
6.3 Vector Algorithms 155
Hedgehogs and Oriented Glyphs 155
Warping 156
Displacement Plots 156
Time Animation 157
Streamlines 160
6.4 Tensor Algorithms 161
Tensor Ellipsoids 163
6.5 Modelling Algorithms 165
Source Objects 165
Implicit Functions 166
Implicit Modelling 169
Glyphs 171
Cutting 172
6.6 Putting It All Together 173
Process Object Design 173
Color Maps 176
Implicit Functions 178
Contouring 178
Cutting 180
Glyphs 180
Streamlines 182
Abstract Filters 182
Visualizing Blood Flow 183
6.7 Chapter Summary 184
6.8 Bibliographic Notes 187
6.9 References 188
6.10 Exercises 190

Chapter 7 Advanced Computer Graphics 193

7.1 Transparency and Alpha Values 193
7.2 Texture Mapping 195

7.3 Volume Rendering....197
7.4 Image-Order Volume Rendering....199
7.5 Object-Order Volume Rendering....205
7.6 Other Volume Rendering Methods....209
7.7 Volume Classification....211
7.8 Volumetric Illumination....213
7.9 Regions of Interest....218
7.10 Intermixing Volumes and Geometry....220
7.11 Efficient Volume Rendering....221
7.12 Interactive Volume Rendering....222
7.13 Volume Rendering Future....222
7.14 Stereo Rendering....223
7.15 Aliasing....226
7.16 Camera Tricks....228
7.17 Mouse-Based Interaction....229
7.18 3D Widgets and User Interaction....230
7.19 Putting It All Together....233
Texture Mapping....233
Volume Rendering....233
Red-Blue Stereo....234
Motion Blur....234
Focal Depth....237
vtkLineWidget....237
7.20 Chapter Summary....239
7.21 Bibliographic Notes....240
7.22 References....240
7.23 Exercises....242

Chapter 8 Advanced Data Representation 245

8.1 Coordinate Systems....245
Global Coordinate System....245
Dataset Coordinate System....245
Structured Coordinate System....246
8.2 Interpolation Functions....247
General Form....247
Specific Forms....248
8.3 Coordinate Transformation....254
Dataset to Global Coordinates....256
Global to Dataset Coordinates....256
8.4 Computing Derivatives....258
8.5 Topological Operations....260
Cell Operations....261
Dataset Operations....261
8.6 Searching....262
8.7 Cell / Line Intersection....263
8.8 Scalars and Colors....264
8.9 Special Techniques for Image Data....266
Coordinate Transformation....266
Derivative Computation....266
Topology....267
Searching....268

8.10 Putting It All Together 268
Unstructured Topology 268
Abstract Interfaces 270
Traversing Intermediate Topology 275
Color Scalar Data 275
Searching 276
Picking 278
Examples 279
8.11 Chapter Summary 283
8.12 Bibliographic Notes 284
8.13 References 285
8.14 Exercises 286

Chapter 9 Advanced Algorithms 289

9.1 Scalar Algorithms 289
Dividing Cubes 289
Carpet Plots 292
Clipping With Scalar Fields 293
9.2 Vector Algorithms 296
Streamribbons and Streamsurfaces 296
Stream Polygon 297
Vector Field Topology 299
9.3 Tensor Algorithms 302
Hyperstreamlines 302
9.4 Modelling Algorithms 303
Visualizing Geometry 303
Data Extraction 304
Probing 306
Triangle Strip Generation 307
Connectivity 307
Polygon Normal Generation 310
Decimation 311
Mesh Smoothing 318
Swept Volumes and Surfaces 320
Visualizing Unstructured Points 323
Multidimensional Visualization 329
Texture Algorithms 330
9.5 Putting It All Together 334
Dividing Cubes / Point Generation 334
Clipping with Scalar Fields 335
Swept Volumes and Surfaces 336
Multidimensional Visualization 338
Connectivity 340
Decimation 341
Texture Clipping 341
Delaunay Triangulation 344
9.6 Chapter Summary 344
9.7 Bibliographic Notes 347
9.8 References 348
9.9 Exercises 351

Chapter 10 Image Processing 353

10.1 Introduction 353
10.2 Data Representation 354
Regions of Interest 354
Streaming and Caching 355
Attribute Data and Components 355
10.3 Algorithms 355
Image Restoration 356
Nonlinear Smoothing 357
Low Frequency Artifacts 357
Image Enhancement 358
Frequency Domain 361
Image Segmentation 366
Postprocessing 367
Multispectral Segmentation 369
10.4 Putting It All Together 370
Data Representation 370
Create an Image 371
Gradient Magnitude 371
Image Warping 371
Regression Testing 372
10.5 Chapter Summary 375
10.6 Bibliographic Notes 375
10.7 References 375
10.8 Exercises 377

Chapter 11 Visualization on the Web 379

11.1 Motivation 379
11.2 Early Web Visualization 380
11.3 Virtual Reality Modeling Language (VRML) 383
11.4 A VRML Visualization Server 386
11.5 Visualization with Java 388
11.6 Java3D 390
11.7 VRML, Java, and the EAI 393
11.8 The Future of Web Visualization 398
11.9 Chapter Summary 399
11.10 Bibliographic Notes 399
11.11 References 399

Chapter 12 Applications **401**

12.1 3D Medical Imaging 401
12.2 Creating Models from Segmented Volume Data 408
12.3 Financial Visualization 419
12.4 Implicit Modelling 424
12.5 Computational Fluid Dynamics 429
12.6 Finite Element Analysis 435
12.7 Algorithm Visualization 437
12.8 Chapter Summary 439
12.9 Bibliographic Notes 442
12.10 References 442
12.11 Exercises 443

Glossary **445**

Index **459**
